EDUCATION

Texas A&M University, College Station, Texas, USA
Master of Science in Computer Science

Aug 2025 – May 2027
GPA: 4.0/4.0

SRM Institute of Science and Technology, Chennai, India
Bachelor of Technology in Computer Science and Engineering

Jun 2019 – May 2023
GPA: 9.73/10

TECHNICAL SKILLS

Languages: Python, SQL, C++, C, R, JavaScript

Machine Learning & AI: PyTorch, TensorFlow, scikit-learn, LLMs, Retrieval-Augmented Generation (RAG), LoRA, PEFT, Hugging Face Transformers, LangChain, FastAPI, NLP, Computer Vision, OpenCV, PySpark, ETL

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, MATLAB

Databases & Cloud: MySQL, PostgreSQL, Snowflake, AWS (EC2, S3), GCP, Docker, Git, GitHub, CI/CD

EXPERIENCE

Decision Science Intern

May 2026 – Present

Farmers Insurance Group, United States

- Researching and implementing a **credibility adjustment pipeline** for insurance risk analytics using **statistical modeling techniques, Python, and SQL** to improve loss ratio relativities (LRR).
- Configuring, executing, and validating **GLM-based insurance risk modeling pipelines**, evaluating predictive performance, model stability, and statistical behavior across multiple insurance rating factors.
- Integrating the credibility adjustment pipeline into the existing **ROC actuarial modeling pipeline**, streamlining automated data processing and model validation in collaboration with engineering and actuarial teams.

Business Technology Solutions Associate

Jun 2023 – Jul 2024

ZS Associates, Pune, India

- Engineered **high-efficiency data pipelines** using **Python, SQL, and PySpark**, processing and transforming **10M+ healthcare and pharmaceutical records** to support downstream analytics and reporting.
- Consolidated multi-source datasets and developed business metrics; retrained ML models (**XGBoost, K-Means**) with domain constraints, improving **pharmaceutical sales targeting decision accuracy by 30%**.
- Automated **pipeline orchestration, scheduling, and validation** and performed **end-to-end testing and performance optimization**, improving **processing time by 35%**.

Software Engineering Intern

Jan 2022 – Apr 2022

HighRadius, India

- Built and deployed an **AI-enabled FinTech application** using **Python, Java, MySQL, JavaScript, and REST APIs**, integrating ML models for **payment delay prediction** and predictive invoice analytics.

PROJECTS

ARgueVis: Real-Time AR Argument Mining and Debate Intelligence System

Jan 2025 – Present

- Built a low-latency **end-to-end argument mining pipeline** (audio, ASR via Deepgram/Whisper, segmentation, LLM inference) using **FastAPI, WebSockets, LangChain**; with speaker attribution (ECAPA-TDNN) and semantic linking (MiniLM + heuristics) for real-time support/attack graph construction and debate analysis.
- Fine-tuned **LLaMA-based models** using **PyTorch, LoRA, and PEFT** for argument unit detection, generating **structured insights** (gaps, comparisons, and LLM suggestions) on the **Even G2 Pro AR device**.

HONORS & ACHIEVEMENTS

- **Silver Medalist (Rank 2)**, B.Tech CSE, SRMIST; **Scholarship Recipient** (3 years)
- Publications: **IEEE (ICCCNT 2023)** (IoT Monitoring), **IJRASET 2023** (CNN-based Fatigue Detection)
- **Graduate Student Technician**, Texas A&M- Senior Grader for **CSCE 431 (SWE)**, **CSCE 481 (Seminar)**
